Enigmail er en utvidelse til Mozilla Thunderbird som legger til støtte for OpenPGP. For å gjøre OpenPGP tilgjengelig for så mange som mulig har jeg valgt å lage og vedlikeholde en norsk oversettelse av Enigmail slik at en kan bruke Enigmail på norsk.

Thunderbird er også tilgjengelig på norsk, og med oversettelse for Enigmail er hele pakken oversatt. Man kan få den norske versjonen av Thunderbird fra <http://www.mozilla.com/thunderbird/all.html>

Enigmail is an extension for Mozilla Thunderbird adding support for OpenPGP. In order for it to be available to as many as possible I've volunteered to create and maintain a Norwegian Language pack allowing for Norwegian users to use it in their native language.

Thunderbird is also available in Norwegian and the Enigmail language pack complete the translation once the extension has been installed. You can get the Norwegian version of Thunderbird from <http://www.mozilla.com/thunderbird/all.html>
